Overview

This 1 day comprehensive SMS introduction and ICAO compliant course will give you a fundamental SMS introduction supported by practical experience through interactive exercises. Workshops will include activities such as creation of safety policy, hazard identification, risk assessment and mitigation. The course is evaluated through a final exam rewarded by a successful completion certificate.

Goals

- Acquire practical techniques and skills to implement and manage a safety management system as well as measuring its performance
- Target resources appropriately and measure the results
- Manage safety risks proactively
- Build a positive safety culture
- Communicate effectively on safety with the civil aviation authority, customers, insurance underwriters and financial institutions

Key topics

- Basic Safety Concepts
- Introduction to SMS
- Safety Policy & Accountabilities
- Management commitment & responsibility
- Hazards Identification
- Safety Risk Management
- Safety Promotion

Who will benefit

- Managers/Postholders
- Technical/Operational staff

Certification awarded

You will earn a training certificate upon successful completion of this course. The certificate will endorse the ICAO compliant syllabus and successful completion of the final exam.
